SAFETY INFORMATION

ABOUT PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms; Children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

OTHER IMPORTANT HEALTH AND SAFETY INFORMATION

The Xbox Instruction Manual contains important health and safety information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of gameplay may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

The motorcycles and all terrain vehicles (ATVs) included in this game may be different from the actual motorcycles and ATVs in terms of movement and performance. The racing and tricks in this game are intended to be fantasy. **DO NOT IMITATE THE RIDING AND MOVEMENTS SHOWN IN THIS GAME.** The manufacturers and distributors of the motorcycles and ATVs shown in this game recommend that all riders take a motorcycle and ATV training course. When riding a motorcycle or ATV, always wear a helmet, goggles and protective gear. Always supervise young riders. Always avoid excessive speeds and be careful on difficult terrain. And remember, when riding a motorcycle or ATV in real life, always ride it safely.

RACING TIPS

Learn to use the clutch to get maximum acceleration coming off jumps and out of turns!

Pull in the clutch (**C**), grip the throttle (**C**), lean back slightly (\downarrow) and let 'er rip (release **C**) for a short burst of power. Be careful, though; you don't want to loop your machine! (Use this same trick to pop a wheelie--just lean back farther.)

Lean back (\downarrow) going through whoop sections to get through them faster.

Lean forward (\uparrow) and pop the clutch as soon as the gate drops to ace the hole shot.

Keep an eye out for shadows coming down on top of you. Having another rider drop on your head will cause both of you to crash.

TRICK TIPS

To get more air off of jumps, get max preload on your suspension. Press ↓ at the bottom of the jump and press ↑ quickly just as you leave the jump. For backflips and Three Sixty Flips, press R + ↑ (or ↓) at the bottom of the jump and ↓ (or ↑) at the lip of the jump.

Press and hold the last button(s) in a trick sequence to hold the trick for max points. Some tricks, such as the No-Hander, can even be held all the way until you land.

You can perform multiple tricks before landing. Input the next trick before the first trick finishes, but be sure you have enough time to finish the last trick before you land!

Add tricks to backflips and Three Sixty Flips for major points!
